## Improper/Mixed Number Fractions

| $\frac{13}{5}$ | $2 \frac{3}{5}$ | $\frac{3}{5}$ |  |
| :---: | :---: | :---: | :---: |
| Improper <br> fraction | Mixed <br> Number | Whole number |  |

An improper fraction is a fraction where the numerator is larger than the denominator. To turn an improper fraction into a mixed number:
1.) Divide the numerator by the denominator. $13 \div 5=2 \mathrm{r} 3$
2.) There are now 2 (whole number) with 3 remainders. Any remainders remain as the
numerator.

## Adding and Subtracting Fractions

Before you can add or subtract fractions with different denominators, you must first find equivalent fractions with the same denominator.
$\frac{1}{3}+\frac{2}{7}=$
Find a number (product) the denominators are both a factor of. In this case 3 and 7 are factors of 21 .

$$
\frac{1 \times 7}{3 \times 7}+\frac{2 \times 3}{7 \times 3}=\frac{7}{21}+\frac{6}{21}
$$

Remember, whatever you do to the denominators you must also do to the numerators.

$$
\frac{7}{21}+\frac{6}{21}=\frac{7+6}{21}=\frac{13}{21}
$$

Now you can simply add (or subtract) the numerators and write the sum over the common denominator.

## Equivalent Fractions

Equivalent fractions are fractions that look different but show exactly the same amount.

$$
\frac{1}{2}=\frac{8}{16} \quad \frac{12}{18}=\frac{2}{3}
$$

You can make equivalent fractions by multiplying or dividing the numerator and denominator by the same number.

SO...

$$
?=2 \times 3=6 \quad ?=24 \div 4=6
$$

Can you use the fraction wall to spot equivalent fractions?

| 1 |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\frac{1}{2}$ |  |  |  |  | $\frac{1}{2}$ |  |  |  |  |
| $\frac{1}{3}$ |  |  |  | $\frac{1}{3}$ |  |  | $\frac{1}{3}$ |  |  |
|  |  |  |  |  | $\frac{1}{4}$ |  | $\frac{1}{4}$ |  |  |
|  | 5 | $\frac{1}{5}$ |  |  |  | $\frac{1}{5}$ |  | $\frac{1}{5}$ |  |
| $\frac{1}{6}$ |  | $\frac{1}{6}$ | $\frac{1}{6}$ |  | $\frac{1}{6}$ |  | $\frac{1}{6}$ |  |  |
| $\frac{1}{8}$ | 8 | $\frac{1}{3}$ | 1 | 8 | $\frac{1}{8}$ | $\frac{1}{8}$ |  | 3 | $\frac{1}{8}$ |
| $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ | $\frac{1}{10}$ |
| $\frac{1}{12}$ | $\frac{1}{12}$ | $\left.\frac{1}{12} \right\rvert\, \frac{1}{12}$ | $\frac{1}{12}$ | $\frac{1}{12}$ | $\frac{1}{12}$ | $\frac{1}{12}$ | $\frac{1}{2} \frac{1}{12}$ | $\frac{1}{12}$ | $\frac{1}{12}$ |

$$
\frac{1}{2}=\frac{2}{4}=\frac{3}{6}=\frac{4}{8}=\frac{5}{10}=\frac{6}{12}
$$
